Absorption
Differential absorption vitamin D_3 and 1,25-dihydroxyvitamin D_3 by intestinal jejunal cells of the rat, 17
Buccal drug absorption II: In vitro diffusion across the hamster cheek pouch, 160
Intestinal absorption of drugs I: The influence of taurocholate on the absorption of dantrolene in the small intestine of the rat, 285
A pharmacokinetic model for the percutaneous absorption of indomethacin and the prediction of drug disposition kinetics, 319
Calcium ion sequestration by *N*-acylamino acids within the rectal membrane and the enhancement of the rectal absorption of sodium ampicillin in rats, 499
Variability in the absorption and disposition of erythromycin estolate in humans, 635
Variable effects of laurocapram (azone) on rectal cefoxitin absorption in rats, 691
Characterization of the oral absorption of β-lactam antibiotics II: Competitive absorption and peptide carrier specificity, 723
Atropine absorption after intramuscular administration with 2-pralidoxime chloride by two automatic injector devices, 728
Improvement of systemic absorption of insulin through eyes with absorption enhancers, 815
The delivery of peptides, 883
Relationship between in vivo first-order intestinal absorption rate constant and the membrane permeability clearance, 922
Intestinal absorption mechanism of dipeptide angiotensin converting enzyme inhibitors of the lysyl-proline type: Lisinopril and SQ 29,852, 995

Accessibility factors
Accessibility factors for diffusion-controlled drug delivery systems, 146

Acetaminophen
Effect of amiodarone on the disposition of acetaminophen in the rat, 900

Acetazolamide
Preformulation studies of acetazolamide: Effect of pH, two buffer species, ionic strength, and temperature on its stability, 855

***N*-Acylamino acids**
Calcium ion sequestration by *N*-acylamino acids within the rectal membrane and the enhancement of the rectal absorption of sodium ampicillin in rats, 499

Adenosine
Penetration of theophylline and adenosine into excised human skin from binary and ternary vehicles: Effect of a nonionic surfactant, 149

Adriamycin
Evaluation of drug delivery following the administration of magnetic albumin microspheres containing adriamycin to the rat, 190
Ultrastructural disposition of adriamycin-associated magnetic albumin microspheres in rats, 290

Albumin
Kinetics of albumin in rats I: Dose-dependent elimination from blood after intravenous administration, 200
Ultrastructural disposition of adriamycin-associated magnetic albumin microspheres in rats, 290

***N*-Alkylazacycloheptan-2-one**
Toxicity screening of *N*-alkylazacycloheptan-2-one derivatives in cultured human skin cells: Structure–toxicity relationships, 738

Amikacin
Application of Bayesian estimation for the prediction of an appropriate dosage regimen of amikacin, 753

Amino acids
Stabilizing effects of some amino acids on membranes of rabbit erythrocytes perturbed by chlorpromazine, 3

***p*-aminohippuric acid**
Technetium-99m labeled *p*-aminohippuric acid analogues: Renal function agents, 829

Amiodarone
Effect of amiodarone on the disposition of acetaminophen in the rat, 900

Amphotericin
Pharmacokinetics and toxicity of continuous infusion amphotericin B in cancer patients, 307

Ampicillin
Calcium ion sequestration by *N*-acylamino acids within the rectal membrane and the enhancement of the rectal absorption of sodium ampicillin in rats, 499

Analgesics
Analgesic and anti-inflammatory effects of some benzanilides, 460

Antianginal agents
Gas chromatographic assay and disposition of 6-chloro-2-pyridylmethyl nitrate, a new antianginal drug, in healthy volunteers, 206
Simultaneous high-performance liquid chromatography assay of two metabolites of 6-chloro-2-pyridylmethyl nitrate, a new antianginal drug, and its application to a pharmacokinetic study in rats, 515

Antiarrhythmic agents
Prediction of acute myocardial disposition of antiarrhythmic drugs, 384

Antibiotic agents
Serum protein binding of lomefloxacin, a new antimicrobial agent and its related quinolones, 504
Synthesis and in vitro antibacterial activity of some 1-(difluoromethoxyphenyl)quinolone-3-carboxylic acids, 585
Characterization of the oral absorption of β-lactam antibiotics II: Competitive absorption and peptide carrier specificity, 723
Synthesis and antimicrobial activity of new substituted 10-methyl-1,2-dihydro-1-oxo-1,2,4-triazino(4,5-*a*)indoles, 780
Uptake of O-alkyl erythromycin derivatives in the lung tissue and cells of rats, 783
Quinolone antimicrobial agents, 787
Pseudopolymorphism and phase stability in four solid forms of (6*R*,7*R*)-7-[2-(5-amino-1,2,4-thiadiazol-3-yl)-(*Z*)-2-methoxy-iminoacetamid]-3-[(4-carbamoyl-1-quinuclidinio)methyl]-8-oxo-5-thia-1-azabicyclo-[4,2,0]oct-2-ene-2-carboxylate (E1040), 893

Antibodies
Removal of digoxin from the circulation using immobilized monoclonal antibodies, 393
Digoxin immunoassay with monoclonal and polyclonal antibodies using time-resolved fluorometry, 617

Anticonvulsant agents
Improved anticonvulsant activity of phenytoin by a redox brain delivery system I: Synthesis and some properties of the dihydropyridine derivatives, 609
Improved anticonvulsant activity of phenytoin by a redox brain delivery system II: Stability in buffers and biological materials, 732
Improved anticonvulsant activity of phenytoin by a redox brain delivery system III: Brain uptake and pharmacological effects, 837

Antifungal agents
Synergistic antifungal action of 8-quinolinol and its bischelate with copper(II) and with mixed ligand chelates composed of copper(II), 8-quinolinol, and aromatic hydroxy acids, 975

Anti-inflammatory agents
Binding of nonsteroidal anti-inflammatory agents and their effect on binding of racemic warfarin and its enantiomers to human serum albumin, 195
Indeno[1,2-*c*]pyrazolone acetic acids as semirigid analogues of the nonsteroidal anti-inflammatory drugs, 343
Nonsteroidal anti-inflammatory drugs, 351
Physicochemical properties of dexamethasone palmitate, a high fatty acid ester of an anti-inflammatory drug: Polymorphism and crystal structure, 417
Analgesic and anti-inflammatory effects of some benzanilides, 460
Quantum mechanical study and nuclear magnetic resonance measurements of some α-arylcarboxyalkyl acids as anti-inflammatory agents, 764
Anti-inflammatory activity of substituted 1,3,4-oxadiazoles, 999

Antimicrobial agents
Definition of a physiologic pharmacokinetic model of cutaneous drug distribution using the isolated perfused porcine skin flap, 550

Antitumor agents
Antitumor imide derivatives of 7-oxabicyclo[2.2.1]heptane-2,3-dimethyl-2,3-dicarboxylic acid, 66
Self-association and solubility behaviors of a novel anticancer agent, Brequinar sodium, 95

2,3-Bis(2-pyridyl)-5,8-quinoxalinediones with metal chelating properties: Synthesis and biological evaluation, 267
A gas chromatographic mass spectrometric assay for the determination of aphidicolin in plasma of cancer patients, 399
Heptakis(2,6-di-O-methyl)-β-cyclodextrin complexation with the antitumor agent chlorambucil, 427
Cytotoxic effects of methionine alkyl esters and amides in normal and neoplastic cell lines, 465
Definition of a physiologic pharmacokinetic model of cutaneous drug distribution using the isolated perfused porcine skin flap, 550
Degradation and disposal of some antineoplastic drugs, 652
6-Bis-(2-chloroethyl)amino-6-deoxy-D-galactopyranose hydrochloride: Synthesis, chemical characterization, *murine P388 antitumor activity, and bone marrow toxicity,* 918

Aphidicolin
A gas chromatographic mass spectrometric assay for the determination of aphidicolin in plasma of cancer patients, 399

β-Arteether
Micellar solubilization of a new antimalarial drug, *β-arteether, 574*

α-Arylcarboxyalkyl acids
Quantum mechanical study and nuclear magnetic resonance *measurements of some α-arylcarboxyalkyl acids as* anti-inflammatory agents, 764

Atenolol
Liquid chromatographic analysis of atenolol enantiomers in human plasma and urine, 1035

Atropine
Atropine absorption after intramuscular administration with 2-pralidoxime chloride by two automatic injector devices, 728

Auronofin
Electrochemical behavior and polarographic determination of *auronofin, 589*

Bagasse
Preliminary studies of the development of a direct *compression cellulose excipient from Bagasse, 508*

Benzanilides
Analgesic and anti-inflammatory effects of some benzanilides, *460*

Benzodiazepine receptors
Tricyclic heteroaromatic systems: Synthesis, [^{3}H]flunitrazepam brain membrane binding inhibition, and structure–activity relationships of 2,3-dihydro-2-aryl-4-*R*-[1]benzopyrano[4,3-*c*]pyrazole-3-ones, *239*

Benzodiazepines
Synthesis of 1,5-diaryl-3-methyl-1*H*-pyrazolo[4,5-*c*]isoquinolines and studies of binding to specific peripheral benzodiazepines binding sites, 437

Bile acids
Non-micelle forming bile acids increase biliary gentamicin excretion in the rat, 648

Binding studies
Binding of nonsteroidal anti-inflammatory agents and their effect on binding of racemic warfarin and its enantiomers *to human serum albumin, 195*
Tricyclic heteroaromatic systems: Synthesis, [^{3}H]flunitrazepam brain membrane binding inhibition, and *structure–activity relationships of 2,3-dihydro-*2-aryl-4-*R*-[1]benzopyrano[4,3-*c*]pyrazole-3-ones, 239
Determination of enzyme or binding constants using generalized linear models, with particular reference to Michaelis–Menten models, 413
Synthesis of 1,5-diaryl-3-methyl-1*H*-pyrazolo[4,5-*c*]isoquinolines and studies of binding to specific peripheral benzodiazepines binding sites, 437
Serum protein binding of lomefloxacin, a new antimicrobial agent and its related quinolones, 504
Effects of hydrotropic agents on the solubility, precipitation, and protein binding of etoposide, 577
Competitive protein binding assay for piritrexim, 749
Factors affecting ceftriaxone plasma protein binding during open heart surgery, 807
Design, synthesis, DNA binding and biological activity of a series of DNA minor-groove-binding intercalating drugs, 910

Bioavailability
Pharmacokinetics of low-dose methotrexate in rheumatoid arthritis patients, 165
New results on an in vitro model for the study of the influence of fatty meals on the bioavailability of theophylline controlled-release formulations, 261
Comparative bioavailability of a new commercial tablet formulation and two lots of a reference formulation of haloperidol, 443
Concurrent determination of hepatic bioavailability of salicylamide by three techniques in the dog, 462
Effect of viscosity on the pharmacokinetics and biological *response to intranasal desmopressin, 470*
Bioavailability and pharmacokinetics of an oral dopamine prodrug in dogs, 812
Center of gravity of drug level curves: A model-independent parameter useful in bioavailability studies, 848
Power analyses of moment analysis parameter in *bioequivalence tests, 1020*

Brequinar
Self-association and solubility behaviors of a novel anticancer agent, brequinar sodium, 95

Buprenorphine
Pharmacokinetics of morphine and its surrogates IX: Discrepancies among infused buprenorphine plasma concentrations sampled from different veins, 644

Caffeine
Phenylpropanolamine potentiates caffeine neurotoxicity in rats, 986

β-Carbolines
Determination of β-carboline derivatives in biological samples by high-performance liquid chromatography with *fluorescence detection, 622*

Carboxylic acid
Effect of pH and temperature on the solubility of a surface active carboxylic acid, 767

Cefazolin
Age-related change in tissue-to-plasma partition coefficient of cefazolin for noneliminating organs in the rat, 535

Cefoxitin
Variable effects of laurocapram (Azone) on rectal cefoxitin absorption in rats, 691

Ceftriaxone
Stability of parenteral ceftriaxone disodium solutions in frozen and liquid states: Effect of freezing and microwave thawing, 73
Factors affecting ceftriaxone plasma protein binding during open heart surgery, 807
Ion-paired reversed-phase high-performance liquid chromatography assay for determination of ceftriaxone in human plasma and urine, 968

Chemical structures
Structure of tyrocidine micelles in isotropic aqueous solution, 230

Chemiluminescence
Chemiluminescence: Principles and applications in biology and medicine, 787

Chlorambucil
Heptakis(2,6-di-O-methyl)-β-cyclodextrin complexation with the antitumor agent chlorambucil, 427

Chlorothiazide
Effect of temperature and fat content on the solubility of *hydrochlorothiazide and chlorothiazide in milk, 933*

Chlorpheniramine
Chlorpheniramine dissolution and relative urinary excretion *from commercial products, 844*

Chlorpromazine
Stabilizing effects of some amino acids on membranes of rabbit erythrocytes perturbed by chlorpromazine, 3

Cholesterol
Hypolipidemic activity of cyclic imido alkyl ethers, thioethers, sulfoxides, and sulfones, 903

Chromatography
Determination of doxycycline in bovine tissues and body fluids by high-performance liquid chromatography using photodiode array ultraviolet-visible detection, 44
Identification of components in iodinated glycerol, 48
High-performance liquid chromatographic determination of prednisolone and its steroid 21-oate ester derivatives in rat plasma: Pharmacokinetic applications, 105
Separation of liposome populations differing in phosphoinositide content by chromatography on immobilized neomycin, 172
Gas chromatographic assay and disposition of 6-chloro-2-pyridylmethyl nitrate, a new antianginal drug, in healthy volunteers, 206
A simple and rapid liquid chromatographic method for the determination of major metabolites of sulfasalazine in biological fluids, 235
High-performance liquid chromatography method for assay of diltiazem hydrochloride and its related compounds in bulk drug and finished tablets, 243

High-performance liquid chromatographic method for the simultaneous quantitation of diflunisal and its glucuronide and sulfate conjugates in human urine, 250
Specific assay for the quantitation of indocyanine green in rat plasma using high-performance liquid chromatography with fluorescence detection, 328
A gas chromatographic mass spectrometric assay for the determination of aphidicolin in plasma of cancer patients, 399
Simultaneous high-performance liquid chromatography assay of two metabolites of 6-chloro-2-pyridylmethyl nitrate, a new antianginal drug, and its application to a pharmacokinetic study in rats, 515
High-performance liquid chromatography assay of diltiazem and six of its metabolites in plasma: Application to a pharmacokinetic study in healthy volunteers, 592
Determination of β-carboline derivatives in biological samples by high-performance liquid chromatography with fluorescence detection, 622
Two chromatographic methods for the determination of corticosteroids in human biological fluids: Pharmacokinetics applications, 660
Gas-liquid chromatography-mass spectroscopy determination of clopamide in plasma, 679
Simultaneous determination of propranolol enantiomers in plasma by high-performance liquid chromatography with fluorescence detection, 771
Analysis of pirprofen in cerebrospinal fluid, plasma, and synovial fluid by high-performance liquid chromatography with electrochemical detection, 776
Use of liquid chromatography and mass spectroscopy to select an oligomer representative of polyester hydrolysis pathways, 858
Analysis of 2-cyano-1-methyl-3-[4-(4-methyl-6-oxo-1,4,5,6-tetrahydropyridazin-3-yl)phenyl]guanidine in dog plasma by liquid–solid extraction and reversed-phase high-performance liquid chromatography, 874
Ion-paired reversed-phase high-performance liquid chromatography assay for determination of ceftriaxone in human plasma and urine, 968
Liquid chromatographic analysis of atenolol enantiomers in human plasma and urine, 1035
Gas chromatographic analysis of anomeric composition of lactose, 1055

Cimetidine
Pharmacokinetic analysis of single- or multiple-dose plasma drug concentration data with a microcomputer using multi-fraction absorption models, 154

Ciprofloxacin
Ciprofloxacin product information monograph: Compendium of preclinical and clinical data, 787

Clearance
Hepatic drug clearance in children: Studies with indocyanine green as a model substrate, 452
Blood clearance and organ distribution of intravenously administered polymethacrylic nanoparticles in mice, 481
Pharmacokinetics and saturable renal tubular secretion of zidovudine in rats, 530
Effect of probenecid on the renal and nonrenal clearances of zidovudine and its distribution into cerebrospinal fluid in the rabbit, 716
Relationship between in vivo first-order intestinal absorption rate constant and the membrane permeability clearance, 922

Clopamide
Gas-liquid chromatography-mass spectroscopy determination of clopamide in plasma, 679

Cocaine
Mass spectrometric studies of cocaine disposition in animals and humans using stable isotope-labeled analogues, 1009

Colchicine
Effect of treatment with phospholipase A_2, colchicine, and β-galactosidase on agglutination of rat hepatocytes, 547

Corticosteroids
Two chromatographic methods for the determination of corticosteroids in human biological fluids: Pharmacokinetics applications, 660

Coumarin
Comparative pharmacokinetics of coumarin anticoagulants XLIX: Nonlinear tissue distribution of *S*-warfarin in rats, 541

Cromoglycic acid
Respirable form of crystals of cromoglycic acid, 176

Dantrolene
Intestinal absorption of drugs I: The influence of taurocholate on the absorption of dantrolene in the small intestine of the rat, 285

Degradation
Characterization of the solution degradation products of etintidine, an H_2-receptor antagonist, 21
Degradation kinetics of (±)-4′-ethyl-2-methyl-3-(1-pyrrolidinyl)propiophenone hydrochloride (HY-770) and structure–stability relationship among its analogues in aqueous solution, 57
Kinetic mechanisms for the concentration dependency of in vitro degradation of nitroglycerin and glyceryl dinitrates in human blood: Metabolite inhibition or cosubstrate depletion?, 295
Degradation of trimethoprim, 348
Isoxazoles V: Chemical stability of diisoxazolylnaphthoquinone in aqueous solution, 408
Degradation and disposal of some antineoplastic drugs, 652
Substituent effects on degradation rates and pathways of cytosine nucleosides, 802

Dermatan
Examination of a possible role for dermatan sulfate in the aggregation of commercial heparin samples, 214

Desmopressin
Effect of viscosity on the pharmacokinetics and biological response to intranasal desmopressin, 470

Dexamethasone
Physicochemical properties of dexamethasone palmitate, a high fatty acid ester of an anti-inflammatory drug: Polymorphism and crystal structure, 417
Direct radioimmunoassay procedure for plasma dexamethasone with a sensitivity at the picogram level, 1040

Dextran
Control of pharmaceutical properties of soybean trypsin inhibitor by conjugation with dextran I: Synthesis and characterization, 117
Control of pharmaceutical properties of soybean trypsin inhibitor by conjugation with dextran II: Biopharmaceutical and pharmacological properties, 219

Diclofenac
Automated robotic extraction and subsequent analysis of diclofenac in plasma samples, 247

Diflunisal
High-performance liquid chromatographic method for the simultaneous quantitation of diflunisal and its glucuronide and sulfate conjugates in human urine, 250

Digoxin
Removal of digoxin from the circulation using immobilized monoclonal antibodies, 393
Digoxin immunoassay with monoclonal and polyclonal antibodies using time-resolved fluorometry, 617

Dilazep
Therapeutic tolerance, hemodynamic effects, and oral dose kinetics of dilazep dihydrochloride in hypertensive patients, 281

Diltiazem
High-performance liquid chromatography method for assay of diltiazem hydrochloride and its related compounds in bulk drug and finished tablets, 243
High-performance liquid chromatography assay of diltiazem and six of its metabolites in plasma: Application to a pharmacokinetic study in healthy volunteers, 592
Pharmacokinetics of an oral sustained-release diltiazem preparation, 960

Dissolution
Chlorpheniramine dissolution and relative urinary excretion from commercial products, 844

L-Dopa
A new potential prodrug to improve the duration of L-dopa: L-3-(3-hydroxy-4-pivaloyloxyphenyl)alanine, 525

Dopamine
Bioavailability and pharmacokinetics of an oral dopamine prodrug in dogs, 812

Dosage studies
Sterile dosage forms. Third edition, 85
Application of Bayesian estimation for the prediction of an appropriate dosage regimen of amikacin, 753

Dosing studies
Single dose kinetics of thioridazine and its two psychoactive metabolites in healthy humans: A dose proportionality study, 796

Doxorubicin
Effect of carrier dose on the multiple tissue disposition of doxorubicin hydrochloride administered via magnetic albumin microspheres in rats, 745

Doxycycline
Determination of doxycycline in bovine tissues and body fluids by high-performance liquid chromatography using photodiode array ultraviolet-visible detection, 44

Drug delivery systems
Preparation of controlled-release microspheres of ibuprofen with acrylic polymers by a novel quasi-emulsion solvent diffusion method, 68
Sterile dosage forms. Third edition, 85
Accessibility factors for diffusion-controlled drug delivery systems, 146
Buccal drug absorption II: In vitro diffusion across the hamster cheek pouch, 160
Evaluation of drug delivery following the administration of magnetic albumin microspheres containing adriamycin to the rat, 190
In vitro iontophoretic studies using a synthetic membrane, 211
Iontophoretic (transdermal) delivery of drugs: Overview of *historical development, 353*
Iontophoretic drug delivery: Effects of physicochemical factors on the skin uptake of nonpeptide drugs, 355
Iontophoretic delivery of nonpeptide drugs: Formulation optimization for maximum skin permeability, 361
Iontophoretic delivery of model inorganic and drug ions, 365
Transdermal iontophoretic drug delivery: Mechanistic analysis and application to polypeptide delivery, 370
Direct current iontophoretic transdermal delivery of peptide and protein drugs, 376
A pharmacokinetic model for intraperitoneal administration of drugs: Application to teniposide in humans, 389
Transdermal delivery of levonorgestrel IV: Evaluation of membranes, 477
Blood clearance and organ distribution of intravenously administered polymethacrylic nanoparticles in mice, 481
In vitro sodium salicylates release from a sucrose polyester *matrix, 561*
Sustained release of isomazole from matrix tablets administered to dogs, 582
Advances in drug delivery systems, 3, 608
Transdermal drug delivery, 693
Atropine absorption after intramuscular administration with 2-pralidoxime chloride by two automatic injector devices, 728
Improvement of systemic absorption of insulin through eyes with absorption enhancers, 815
Use of liquid chromatography and mass spectroscopy to select an oligomer representative of polyester hydrolysis *pathways, 858*
The delivery of peptides, 883
Enantioselective aspects of the disposition of *dl-threo*-methylphenidate after the administration of a sustained-release formulation to children with attention deficit-hyperactivity disorder, 944
Sustained active ingredient release from drugs: Statistical model for random sample assessment in vitro, 955
Pharmacokinetics of an oral sustained-release diltiazem preparation, 960
Spherical agglomerates of water-insoluble drugs, 964

Drug distribution
Distribution of drugs in polymers loaded by swelling, 25
Possible effect of lactational period on the milk-to-plasma *drug concentration ratio in lactating women: Results of an* in vitro evaluation, 137
Evaluation of drug delivery following the administration of *magnetic albumin microspheres containing adriamycin to* the rat, 190
Gas chromatographic assay and disposition of *6-chloro-2-pyridylmethyl nitrate, a new antianginal drug,* in healthy volunteers, 206
Mean time parameters dealing with the tissue distribution of *drugs: Limitations and extensions, 264*
Ultrastructural disposition of adriamycin-associated magnetic albumin microspheres in rats, 290
A pharmacokinetic model for the percutaneous absorption of indomethacin and the prediction of drug disposition kinetics, 319
Prediction of acute myocardial disposition of antiarrhythmic drugs, 384
Relationship between concentration and anticonvulsant effect of phenytoin against electroshock-induced seizures in rats: Comparison of sampling sites for concentration determinations, 448
Comparative pharmacokinetics of coumarin anticoagulants XLIX: Nonlinear tissue distribution of S-warfarin in rats, 541
Definition of a physiologic pharmacokinetic model of cutaneous drug distribution using the isolated perfused porcine skin flap, 550
Pharmacokinetics of trimethoprim in the rat, 556
Variability in the absorption and disposition of erythromycin *estolate in humans, 635*
Pharmacokinetics of morphine and its surrogates IX: Discrepancies among infused buprenorphine plasma *concentrations sampled from different veins, 644*
Enantioselective aspects of drug action and disposition: Therapeutic pitfalls, 695
Effect of carrier dose on the multiple tissue disposition of doxorubicin hydrochloride administered via magnetic albumin microspheres in rats, 745
Analysis of pirprofen in cerebrospinal fluid, plasma, and synovial fluid by high-performance liquid chromatography with electrochemical detection, 776
Uptake of O-alkyl erythromycin derivatives in the lung tissue and cells of rats, 783
Mass spectrometric studies of cocaine disposition in animals and humans using stable isotope-labeled analogues, 1009
Tetracycline and erythromycin distribution in pathological lungs of humans and rat, 1015

Drug identification
Determination of doxycycline in bovine tissues and body *fluids by high-performance liquid chromatography using* photodiode array ultraviolet-visible detection, 44
Quantitative analysis of trazodone hydrochloride in tablets by an ion-selective electrode, 62
Identification of secretin diastereoisomers produced during synthesis, 91
High-performance liquid chromatographic determination of prednisolone and its steroid 21-oate ester derivatives in rat plasma: Pharmacokinetic applications, 105
High-pressure liquid chromatographic analysis of eflornithine in serum, 114
Immobilized sulfatase: β-Glucuronidase enzymes for the qualitative and quantitative analysis of drug conjugates, 127
Pralidoxime chloride stability-indicating assay and analysis of solution samples stored at room temperature for ten years, 132
Automated robotic extraction and subsequent analysis of diclofenac in plasma samples, 247
High-performance liquid chromatographic method for the simultaneous quantitation of diflunisal and its glucuronide and sulfate conjugates in human urine, 250
Specific assay for the quantitation of indocyanine green in rat plasma using high-performance liquid chromatography with fluorescence detection, 328
Competitive protein binding assay for piritrexim, 749
Simultaneous determination of propranolol enantiomers in plasma by high-performance liquid chromatography with fluorescence detection, 771
Analysis of pirprofen in cerebrospinal fluid, plasma, and synovial fluid by high-performance liquid chromatography with electrochemical detection, 776
Simultaneous determinations of tolbutamide and its hydroxy and carboxy metabolites in serum and urine: Application to pharmacokinetic studies of tolbutamide in the rat, 863
*Analysis of 2-cyano-1-methyl-3-[4-(4-methyl-*6-oxo-1,4,5,6-tetrahydropyridazin-3-yl)phenyl]guanidine in dog plasma by liquid–solid extraction and reversed-phase *high-performance liquid chromatography, 874*
Ion-paired reversed-phase high-performance liquid chromatography assay for determination of ceftriaxone in *human plasma and urine, 968*
A sensitive method for assay of a novel tricyclic compound using coulometric electrochemical detection, 971

Drug release
Sustained active ingredient release from drugs: Statistical model for random sample assessment in vitro, 955

Drug therapy
Drug therapy in dilated cardiomyopathy and myocarditis, 181

Eflornithine
High-pressure liquid chromatographic analysis of eflornithine in serum, 114

Emulsion technology
Encyclopedia of emulsion technology, 607

Enantiomers
Enantiomeric interaction of flurbiprofen in the rat, 632
Enantioselective aspects of drug action and disposition: Therapeutic pitfalls, 695
Simultaneous determination of propranolol enantiomers in plasma by high-performance liquid chromatography with fluorescence detection, 771
Racemization kinetics of enantiomeric oxazepams and stereoselective hydrolysis of enantiomeric oxazepam 3-acetates in rat liver microsomes and brain homogenate, 789

Preparation and properties of (*R*-(−)-1-azaicyclo[2.2.2]oct-3-yl-(*R*)-(+)-α-hydroxy-α-(4-[^{125}I]iodophenyl)-α-phenyl acetate and (*R*)-(−)-1-azabicyclo[2.2.2]oct-3-yl-(*S*)-(−)-α-hydroxy-α-(4-[^{125}I]iodophenyl)-α-phenyl acetate as potential radiopharmaceuticals, 833
Ketoprofen enantiomers in synovial fluid, 881
Liquid chromatographic analysis of atenolol enantiomers in human plasma and urine, 1035

Enzyme studies
Immobilized sulfatase: β-Glucuronidase enzymes for the qualitative and quantitative analysis of drug conjugates, 127
Evidence for lidocaine-induced enzyme inactivation, 1003

Epidermal growth factor
Epidermal growth factor as a regulatory hormone maintaining a low pH microclimate in the rat small intestine, 457

Erythromycin
Variability in the absorption and disposition of erythromycin estolate in humans, 635
Uptake of O-alkyl erythromycin derivatives in the lung tissue and cells of rats, 783
Microbioluminometry assay: Determination of erythromycin activity in plasma or serum, 979
Tetracycline and erythromycin distribution in pathological lungs of humans and rat, 1015

Estramustine
Polymorphism of estramustine, 563

Ethanol
Ethanol and water sorption into stratum corneum and model systems, 472

Ethylene oxide
Residual ethylene oxide determination in polymethyl methacrylate disks and intraocular lenses by headspace gas analysis and *N,N*-dimethylformamide extraction, 40

Ethynylestradiol
Physicochemical properties of crystalline forms of ethynylestradiol solvates: Comparison of thermal behavior with x-ray crystal structure, 274

Etintidine
Characterization of the solution degradation products of etintidine, an H_2-receptor antagonist, 21

Etoposide
Effects of hydrotropic agents on the solubility, precipitation, and protein binding of etoposide, 577

Evaporation rates
Water evaporation rates from a model of stratum corneum lipids, 639

Excipients
Preliminary studies of the development of a direct compression cellulose excipient from Bagasse, 508
Spherical agglomerates of water-insoluble drugs, 964
Compaction properties of microcrystalline cellulose and sodium sulfathiazole in combination with talc or magnesium stearate, 1025
Gas chromatographic analysis of anomeric composition of lactose, 1055

Fluorescence
Digoxin immunoassay with monoclonal and polyclonal antibodies using time-resolved fluorometry, 617
Determination of β-carboline derivatives in biological samples by high-performance liquid chromatography with fluorescence detection, 622
Simultaneous determination of propranolol enantiomers in plasma by high-performance liquid chromatography with fluorescence detection, 771
Fluorescent biomolecules: Methodologies and applications, 1058

Flurbiprofen
Enantiomeric interaction of flurbiprofen in the rat, 632

Galactosidase
Effect of treatment with phospholipase A_2, colchicine, and β galactosidase on agglutination of rat hepatocytes, 547

Gentamicin
Non-micelle forming bile acids increase biliary gentamicin excretion in the rat, 648

Glycerol
Identification of components in iodinated glycerol, 48

Haloperidol
Comparative bioavailability of a new commercial tablet formulation and two lots of a reference formulation of haloperidol, 443

Hemolysis
Interactions between erythrocytes from various animals and emulsions stabilized with various lecithins, 303
Sodium chloride equivalents, cryoscopic properties, and hemolytic effects of certain medicinals in aqueous solutions V: Supplemental values, 519

Hemolytic effects
Sodium chloride equivalents, cryoscopic properties, and hemolytic effects of certain medicinals in aqueous solutions V: Supplemental values, 519

Heparin
Monitoring the purity of pharmaceutical heparin preparations by high-field ^{1}H-nuclear magnetic resonance spectroscopy, 101
Examination of a possible role for dermatan sulfate in the aggregation of commercial heparin samples, 214

Hydralazine
Stability problems with hydralazine *p*-anisaldehyde hydrazone, 432
Pharmacokinetics and biotransformation of hydralazine acetone hydrazone, a metabolite of hydralazine, in the rat, 867

Hydration studies
Effects of long-term hydration leading to the development of polar channels in hairless mouse stratum corneum, 925

Hydrochlorothiazide
Effect of temperature and fat content on the solubility of hydrochlorothiazide and chlorothiazide in milk, 933

Hypolipidemic activity
Hypolipidemic activity of cyclic imido alkyl ethers, thioethers, sulfoxides, and sulfones, 903

Hypovolemia
Kinetics of drug action in disease states XXXV: Effect of hypovolemia on the pharmacodynamics of zoxazolamine in rats, 785

Ibufenac
Quantum mechanical study and nuclear magnetic resonance measurements of some α-arylcarboxyalkyl acids as anti-inflammatory agents, 764

Ibuprofen
Preparation of controlled-release microspheres of ibuprofen with acrylic polymers by a novel quasi-emulsion solvent diffusion method, 68
Quantum mechanical study and nuclear magnetic resonance measurements of some α-arylcarboxyalkyl acids as anti-inflammatory agents, 764

Immune complexes
Inhibitors of immune complex-induced inflammation: 3-[1-(2-benzoxazolyl)hydrazino]propanenitrile derivatives, 494

Immunoassays
Digoxin immunoassay with monoclonal and polyclonal antibodies using time-resolved fluorometry, 617

Indocyanine green
Specific assay for the quantitation of indocyanine green in rat plasma using high-performance liquid chromatography with fluorescence detection, 328
Hepatic drug clearance in children: Studies with indocyanine green as a model substrate, 452

Insulin
Improvement of systemic absorption of insulin through eyes with absorption enhancers, 815

Iontophoresis
In vitro iontophoretic studies using a synthetic membrane, 211
Iontophoretic (transdermal) delivery of drugs: Overview of historical development, 353
Iontophoretic drug delivery: Effects of physicochemical factors on the skin uptake of nonpeptide drugs, 355
Iontophoretic delivery of nonpeptide drugs: Formulation optimization for maximum skin permeability, 361
Iontophoretic delivery of model inorganic and drug ions, 365
Transdermal iontophoretic drug delivery: Mechanistic analysis and application to polypeptide delivery, 370
Direct current iontophoretic transdermal delivery of peptide and protein drugs, 376

Isomazole
Sustained release of isomazole from matrix tablets administered to dogs, 582

Isoxazoles
Isoxazoles V: Chemical stability of diisoxazolylnaphthoquinone in aqueous solution, 408

Ketoprofen
Ketoprofen enantiomers in synovial fluid, 881

Kinetics
Degradation kinetics of (±)-4′-ethyl-2-methyl-3-(1-pyrrolidinyl)propiophenone hydrochloride (HY-770) and structure–stability relationship among its analogues in aqueous solution, 57

Kinetics of drug action in disease states XXXIII: Disparate effects of pentylenetetrazol in rats as a function of renal disease model and pharmacologic endpoint, 142
Kinetics of albumin in rats I: Dose-dependent elimination from blood after intravenous administration, 200
Therapeutic tolerance, hemodynamic effects, and oral dose kinetics of dilazep dihydrochloride in hypertensive patients, 281
Kinetic mechanisms for the concentration dependency of in vitro degradation of nitroglycerin and glyceryl dinitrates in human blood: Metabolite inhibition or cosubstrate depletion?, 295
Relationships between first-order and Michaelis–Menten kinetics, 521
Kinetics of drug action in disease states XXXII: Effect of experimental hypertension on the pharmacodynamics of phenobarbital in rats, 742
Kinetics of drug action in disease states XXXV: Effect of hypovolemia on the pharmacodynamics of zoxazolamine in rats, 785
Racemization kinetics of enantiomeric oxazepams and stereoselective hydrolysis of enantiomeric oxazepam 3-acetates in rat liver microsomes and brain homogenate, 789
Single dose kinetics of thioridazine and its two psychoactive metabolites in healthy humans: A dose proportionality study, 796

Lactose
Gas chromatographic analysis of anomeric composition of lactose, 1055

Laurocapram
Variable effects of laurocapram (Azone) on rectal cefoxitin absorption in rats, 691

Lecithins
Interactions between erythrocytes from various animals and emulsions stabilized with various lecithins, 303

Levonorgestrel
Transdermal delivery of levonorgestrel IV: Evaluation of membranes, 477

Lidocaine
Prediction of acute myocardial disposition of antiarrhythmic drugs, 384
Evidence for lidocaine-induced enzyme inactivation, 1003

Liposomes
Separation of liposome populations differing in phosphoinositide content by chromatography on immobilized neomycin, 172
Liposomes: From biophysics to therapeutics, 181
Characterization of temperature-dependent drug release from liposomes using electron spin resonance, 311
Liposomes as drug carriers: Recent trends and progress, 693

Lipoxygenase
Inhibition of 5-lipoxygenase by substituted 3,4-dihydro-2*H*-1,4-thiazines, 937

Lisinopril
Intestinal absorption mechanism of dipeptide angiotensin converting enzyme inhibitors of the lysyl-proline type: Lisinopril and SQ 29,852, 995

Lomefloxacin
Serum protein binding of lomefloxacin, a new antimicrobial agent and its related quinolones, 504

Medicinal chemistry
Annual reports in medicinal chemistry, 607

Metabolism
Microbial models of mammalian metabolism: Conversion of warfarin to 4′-hydroxywarfarin using *Cunninghamella bainieri*, 183
A simple and rapid liquid chromatographic method for the determination of major metabolites of sulfasalazine in biological fluids, 235
Drugs affecting lipid metabolism, 1057

Methionine
Cytotoxic effects of methionine alkyl esters and amides in normal and neoplastic cell lines, 465

Methotrexate
Pharmacokinetics of low-dose methotrexate in rheumatoid arthritis patients, 165

Methylibuprofen
Quantum mechanical study and nuclear magnetic resonance measurements of some α-arylcarboxyalkyl acids as anti-inflammatory agents, 764

Methylphenidate
Enantioselective aspects of the disposition of *dl-threo*-methylphenidate after the administration of a sustained-release formulation to children with attention deficit-hyperactivity disorder, 944

Mexiletine
Prediction of acute myocardial disposition of antiarrhythmic drugs, 384

Micelles
Structure of tyrocidine micelles in isotropic aqueous solution, 230

Microbioluminometry assay
Microbioluminometry assay: Determination of erythromycin activity in plasma or serum, 979

Microspheres
Biodegradable microspheres XII: Properties of the crosslinking chains in polyacryl starch microparticles, 52
Preparation of controlled-release microspheres of ibuprofen with acrylic polymers by a novel quasi-emulsion solvent diffusion method, 68
Evaluation of drug delivery following the administration of magnetic albumin microspheres containing adriamycin to the rat, 190
Ultrastructural disposition of adriamycin-associated magnetic albumin microspheres in rats, 290
Effect of carrier dose on the multiple tissue disposition of doxorubicin hydrochloride administered via magnetic albumin microspheres in rats, 745

Mitomycin C
Disposition of a polymeric prodrug of mitomycin C, mitomycin C-dextran conjugate, in the perfused rat liver, 11

Mitoxantrone
Population pharmacokinetics of mitoxantrone performed by a NONMEM method, 877

Morphine
Pharmacokinetics of morphine and its surrogates IX: Discrepancies among infused buprenorphine plasma concentrations sampled from different veins, 644

Mosquito repellents
Nuclear magnetic resonance spectra and mosquito repellent properties of some oxazolidine derivatives of 5-methyl-4-hexenal, 109

Nalidixic acid
Pharmacokinetic analysis of single- or multiple-dose plasma drug concentration data with a microcomputer using multi-fraction absorption models, 154

Nanoparticles
Blood clearance and organ distribution of intravenously administered polymethacrylic nanoparticles in mice, 481
New method for the preparation of cyanoacrylic nanoparticles with improved colloidal properties, 1051

Naproxen
Effect of *R* and *S* enantiomers of naproxen on aggregation and thromboxane production in human platelets, 324
Variations of optical rotation of naproxen: Polarimetric determination in the presence of nonchiral basic compounds, 1053

Nefopam
Stereoisomer differentiation for the analgesic drug nefopam hydrochloride using modeling studies of serotonin uptake area, 87

Neomycin
Separation of liposome populations differing in phosphoinositide content by chromatography on immobilized neomycin, 172

Nitroglycerin
Kinetic mechanisms for the concentration dependency of in vitro degradation of nitroglycerin and glyceryl dinitrates in human blood: Metabolite inhibition or cosubstrate depletion?, 295
Ethanol:water mutually enhanced transdermal therapeutic system I: Nitroglycerin solution properties and membrane transport, 314
Ethanol:water mutually enhanced transcermal therapeutic system II: Skin permeation of ethanol and nitroglycerin, 402

Nonionic surfactants
Nonionic surfactants: Physical chemistry, 352

Nuclear magnetic resonance studies
Identification of components in iodinated glycerol, 48
Monitoring the purity of pharmaceutical heparin preparations by high-field ^{1}H-nuclear magnetic resonance spectroscopy, 101
Nuclear magnetic resonance spectra and mosquito repellent properties of some oxazolidine derivatives of 5-methyl-4-hexenal, 109

Nucleosides
Substituent effects on degradation rates and pathways of cytosine nucleosides, 802

Oxadiazoles
Anti-inflammatory activity of substituted 1,3,4-oxadiazoles, 999
Oxazepams
Racemization kinetics of enantiomeric oxazepams and stereoselective hydrolysis of enantiomeric oxazepam 3-acetates in rat liver microsomes and brain homogenate, 789
Oxazolidines
Nuclear magnetic resonance spectra and mosquito repellent properties of some oxazolidine derivatives of 5-methyl-4-hexenal, 109
Oxyhemoglobin
Protective effect of sucrose on spray drying of oxyhemoglobin, 223
Oxyphenbutazone
Physical and structural comparison of oxyphenbutazone monohydrate and anhydrate, 758
Partition coefficients
Age-related change in tissue-to-plasma partition coefficient of cefazolin for noneliminating organs in the rat, 535
Pentylenetetrazol
Kinetics of drug action in disease states XXXIII: Disparate effects of pentylenetetrazol in rats as a function of renal disease model and pharmacologic endpoint, 142
Peptides
Prodrugs of peptides IV: Bioreversible derivatization of the pyroglutamyl group by *N*-acylation and *N*-aminomethylation to effect protection against pyroglutamyl aminopeptidase, 122
Transdermal iontophoretic drug delivery: Mechanistic analysis and application to polypeptide delivery, 370
Direct current iontophoretic transdermal delivery of peptide and protein drugs, 376
Characterization of the oral absorption of β-lactam antibiotics II: Competitive absorption and peptide carrier specificity, 723
The delivery of peptides, 883
Design, synthesis, DNA binding and biological activity of a series of DNA minor-groove-binding intercalating drugs, 910
Percutaneous transport
Penetration of theophylline and adenosine into excised human skin from binary and ternary vehicles: Effect of a nonionic surfactant, 149
Buccal drug absorption II: In vitro diffusion across the hamster cheek pouch, 160
A pharmacokinetic model for the percutaneous absorption of indomethacin and the prediction of drug disposition kinetics, 319
Iontophoretic (transdermal) delivery of drugs: Overview of historical development, 353
Iontophoretic drug delivery: Effects of physicochemical factors on the skin uptake of nonpeptide drugs, 355
Iontophoretic delivery of nonpeptide drugs: Formulation optimization for maximum skin permeability, 361
Iontophoretic delivery of model inorganic and drug ions, 365
Transdermal iontophoretic drug delivery: Mechanistic analysis and application to polypeptide delivery, 370
Direct current iontophoretic transdermal delivery of peptide and protein drugs, 376
Ethanol:water mutually enhanced transcermal therapeutic system II: Skin permeation of ethanol and nitroglycerin, 402
Ethanol and water sorption into stratum corneum and model systems, 472
Transdermal delivery of levonorgestrel IV: Evaluation of membranes, 477
Water evaporation rates from a model of stratum corneum lipids, 639
Transdermal drug delivery, 693
Effects of long-term hydration leading to the development of polar channels in hairless mouse stratum corneum, 925
Permeability
Stabilizing effects of some amino acids on membranes of rabbit erythrocytes perturbed by chlorpromazine, 3
Characterization of temperature-dependent drug release from liposomes using electron spin resonance, 311
Ethanol:water mutually enhanced transdermal therapeutic system I: Nitroglycerin solution properties and membrane transport, 314
Pharmacodynamics
Kinetics of drug action in disease states XXXIII: Disparate effects of pentylenetetrazol in rats as a function of renal disease model and pharmacologic endpoint, 142
Enantioselective aspects of drug action and disposition: Therapeutic pitfalls, 695
Kinetics of drug action in disease states XXXII: Effect of experimental hypertension on the pharmacodynamics of phenobarbital in rats, 742
The delivery of peptides, 883
Pharmacokinetics
High-performance liquid chromatographic determination of prednisolone and its steroid 21-oate ester derivatives in rat plasma: Pharmacokinetic applications, 105
Pharmacokinetic analysis of single- or multiple-dose plasma drug concentration data with a microcomputer using multi-fraction absorption models, 154
Pharmacokinetics of low-dose methotrexate in rheumatoid arthritis patients, 165
Pharmacokinetics of two spiroarsoranes administered intravenously or orally to rabbits, 203
Control of pharmaceutical properties of soybean trypsin inhibitor by conjugation with dextran II: Biopharmaceutical and pharmacological properties, 219
Pharmacokinetics and toxicity of continuous infusion amphotericin B in cancer patients, 307
A pharmacokinetic model for the percutaneous absorption of indomethacin and the prediction of drug disposition kinetics, 319
A pharmacokinetic model for intraperitoneal administration of drugs: Application to teniposide in humans, 389
Determination of enzyme or binding constants using generalized linear models, with particular reference to Michaelis–Menten models, 413
Hepatic drug clearance in children: Studies with indocyanine green as a model substrate, 452
Effect of viscosity on the pharmacokinetics and biological response to intranasal desmopressin, 470
Simultaneous high-performance liquid chromatography assay of two metabolites of 6-chloro-2-pyridylmethyl nitrate, a new antianginal drug, and its application to a pharmacokinetic study in rats, 515
Pharmacokinetics and saturable renal tubular secretion of zidovudine in rats, 530
Comparative pharmacokinetics of coumarin anticoagulants XLIX: Nonlinear tissue distribution of *S*-warfarin in rats, 541
Definition of a physiologic pharmacokinetic model of cutaneous drug distribution using the isolated perfused porcine skin flap, 550
Pharmacokinetics of trimethoprim in the rat, 556
High-performance liquid chromatography assay of diltiazem and six of its metabolites in plasma: Application to a pharmacokinetic study in healthy volunteers, 592
Enantiomeric interaction of flurbiprofen in the rat, 632
Pharmacokinetics of morphine and its surrogates IX: Discrepancies among infused buprenorphine plasma concentrations sampled from different veins, 644
Two chromatographic methods for the determination of corticosteroids in human biological fluids: Pharmacokinetics applications, 660
Gas-liquid chromatography-mass spectroscopy determination of clopamide in plasma, 679
Effect of probenecid on the renal and nonrenal clearances of zidovudine and its distribution into cerebrospinal fluid in the rabbit, 716
Bioavailability and pharmacokinetics of an oral dopamine prodrug in dogs, 812
A pharmacokinetic model in the rat and rabbit of the direct measurement of mature bone resorption in vivo with [^{3}H]tetracycline, 823
Chlorpheniramine dissolution and relative urinary excretion from commercial products, 844
Center of gravity of drug level curves: A model-independent parameter useful in bioavailability studies, 848
Simultaneous determinations of tolbutamide and its hydroxy and carboxy metabolites in serum and urine: Application to pharmacokinetic studies of tolbutamide in the rat, 863
Pharmacokinetics and biotransformation of hydralazine acetone hydrazone, a metabolite of hydralazine, in the rat, 867
Population pharmacokinetics of mitoxantrone performed by a NONMEM method, 877
Phenytoin prodrug 3-phosphoryloxymethyl phenytoin (ACC-9653): Pharmacokinetics in patients following intravenous and intramuscular administration, 929
Numerical stability of pharmacokinetic deconvolution algorithms, 948
Pharmacokinetics of an oral sustained-release diltiazem preparation, 960
Inter- and intrasubject variations of ranitidine pharmacokinetics after oral administration to normal male subjects, 990

On the transformation of compartmental systems and the indeterminacy of the volume of distribution, 1045
Pharmacology
Goth's medical pharmacology. 12th edition, 85
Medicinal chemistry: A biochemical approach, 435
Improved anticonvulsant activity of phenytoin by a redox brain delivery system III: Brain uptake and pharmacological effects, 837
Pharmacotherapy
Pharmacotherapy: A pathophysiologic approach, 607
Clinical drug trials and tribulations, 1057
Clinical pharmacy and therapeutics, 1058
Phenobarbital
Kinetics of drug action in disease states XXXII: Effect of experimental hypertension on the pharmacodynamics of phenobarbital in rats, 742
Phenothiazine
Convenient oxidation of phenothiazine salts to their sulfoxides with aqueous nitrous acid, 334
Phenylpropanolamine
Phenylpropanolamine potentiates caffeine neurotoxicity in rats, 986
Phenytoin
Determination of enzyme or binding constants using generalized linear models, with particular reference to Michaelis–Menten models, 413
Relationship between concentration and anticonvulsant effect of phenytoin against electroshock-induced seizures in rats: Comparison of sampling sites for concentration determinations, 448
Improved anticonvulsant activity of phenytoin by a redox brain delivery system I: Synthesis and some properties of the dihydropyridine derivatives, 609
Improved anticonvulsant activity of phenytoin by a redox brain delivery system II: Stability in buffers and biological materials, 732
Improved anticonvulsant activity of phenytoin by a redox brain delivery system III: Brain uptake and pharmacological effects, 837
Phenytoin prodrug 3-phosphoryloxymethyl phenytoin (ACC-9653): Pharmacokinetics in patients following intravenous and intramuscular administration, 929
Phosphatidylinositol
Separation of liposome populations differing in phosphoinositide content by chromatography on immobilized neomycin, 172
Phospholipase
Effect of treatment with phospholipase A_2, colchicine, and β-galactosidase on agglutination of rat hepatocytes, 547
Photodissociation
Molecular photodissociation dynamics, 435
Physicochemical studies
Physical characterization of the methanol solvate of urapidil, 28
Respirable form of crystals of cromoglycic acid, 176
Polymorphism and crystal structure of 2*R*,4*S*,6-fluoro-2-methyl-spiro[chroman-4,4′-imidazoline]-2′,5-dione (M79175), 256
Physicochemical properties of crystalline forms of ethynylestradiol solvates: Comparison of thermal behavior with x-ray crystal structure, 274
Convenient oxidation of phenothiazine salts to their sulfoxides with aqueous nitrous acid, 334
Polymorphism of sulfathiazole, 337
Nonionic surfactants: Physical chemistry, 352
Physicochemical properties of dexamethasone palmitate, a high fatty acid ester of an anti-inflammatory drug: Polymorphism and crystal structure, 417
Solubilities and solid state properties of the sodium salts of drugs, 485
Sodium chloride equivalents, cryoscopic properties, and hemolytic effects of certain medicinals in aqueous solutions V: Supplemental values, 519
Polymorphism of estramustine, 563
Electrochemical behavior and polarographic determination of auronofin, 589
Physicochemical and structural studies of triamterene, 598
Acid catalyzed hydrolysis of a series of zopiclone analogues, 627
Predicting the solubility of sulfamethoxypyridazine in individual solvents II: Relationship between solute–solvent interaction terms and partial solubility parameters, 672
Release studies from lyotropic liquid crystal systems, 683
Physical and structural comparison of oxyphenbutazone monohydrate and anhydrate, 758
Quantum mechanical study and nuclear magnetic resonance measurements of some α-arylcarboxyalkyl acids as anti-inflammatory agents, 764
Effect of pH and temperature on the solubility of a surface active carboxylic acid, 767
Pseudopolymorphism and phase stability in four solid forms of (6*R*,7*R*)-7-[2-(5-amino-1,2,4-thiadiazol-3-yl)-(*Z*)-2-methoxy-iminoacetamid]-3-[(4-carbamoyl-1-quinuclidinio)methyl]-8-oxo-5-thia-1-azabicyclo-[4,2,0]oct-2-ene-2-carboxylate (E1040), 893
Variations of optical rotation of naproxen: Polarimetric determination in the presence of nonchiral basic compounds, 1053
Piritrexim
Competitive protein binding assay for piritrexim, 749
Pirprofen
Analysis of pirprofen in cerebrospinal fluid, plasma, and synovial fluid by high-performance liquid chromatography with electrochemical detection, 776
Platelets
Effect of *R* and *S* enantiomers of naproxen on aggregation and thromboxane production in human platelets, 324
Poly(lactide) pellets
Evaluation of biodegradable poly(lactide pellets prepared by direct compression, 819
Polymers
Distribution of drugs in polymers loaded by swelling, 25
Pralidoxime
Pralidoxime chloride stability-indicating assay and analysis of solution samples stored at room temperature for ten years, 132
Prednisolone
High-performance liquid chromatographic determination of prednisolone and its steroid 21-oate ester derivatives in rat plasma: Pharmacokinetic applications, 105
Probenecid
Effect of probenecid on the renal and nonrenal clearances of zidovudine and its distribution into cerebrospinal fluid in the rabbit, 716
Prodrugs
Disposition of a polymeric prodrug of mitomycin C, mitomycin C-dextran conjugate, in the perfused rat liver, 11
Prodrugs of peptides IV: Bioreversible derivatization of the pyroglutamyl group by *N*-acylation and *N*-aminomethylation to effect protection against pyroglutamyl aminopeptidase, 122
A new potential prodrug to improve the duration of L-dopa: L-3-(3-hydroxy-4-pivaloyloxyphenyl)alanine, 525
Bioavailability and pharmacokinetics of an oral dopamine prodrug in dogs, 812
Propranolol
Simultaneous determination of propranolol enantiomers in plasma by high-performance liquid chromatography with fluorescence detection, 771
Protein kinase
Potential use of an antagonist of cAMP-dependent protein kinase to block inhibition and modulate T-cell receptor-triggered activation of cytotoxic T-lymphocytes, 8
Quinolinol
Synergistic antifungal action of 8-quinolinol and its bischelate with copper(II) and with mixed ligand chelates composed of copper(II), 8-quinolinol, and aromatic hydroxy acids, 975
Quinolones
Serum protein binding of lomefloxacin, a new antimicrobial agent and its related quinolones, 504
Quinolone antimicrobial agents, 787
Radioimmunoassays
Direct radioimmunoassay procedure for plasma dexamethasone with a sensitivity at the picogram level, 1040
Radiopharmaceuticals
Technetium-99m radiochemical assay by rapid filtration: A superior alternative to chromatography, 490
Technetium-99m labeled *p*-aminohippuric acid analogues: Renal function agents, 829
Preparation and properties of (*R*-(−)-1-azaicyclo[2.2.2]oct-3-yl-(*R*)-(+)-α-hydroxy-α-(4-[^{125}I]iodophenyl)-α-phenyl acetate and (*R*)-(−)-1-azabicyclo[2.2.2]oct-3-yl-(*S*)-(−)-α-hydroxy-α-(4-[^{125}I]iodophenyl)-α-phenyl acetate as potential radiopharmaceuticals, 833
Ranitidine
Inter- and intrasubject variations of ranitidine pharmacokinetics after oral administration to normal male subjects, 990

Rate constants
Analysis of consecutive pseudo-first-order reactions II: Calculation of the rate constants from the co-product or co-reactant data, 78
Robotic extraction
Automated robotic extraction and subsequent analysis of diclofenac in plasma samples, 247
Salicylamide
Concurrent determination of hepatic bioavailability of salicylamide by three techniques in the dog, 462
Salicylate
In vitro sodium salicylates release from a sucrose polyester matrix, 561
Secretin
Identification of secretin diastereoisomers produced during synthesis, 91
Sepharose
Separation of liposome populations differing in phosphoinositide content by chromatography on immobilized neomycin, 172
Serotonin
Stereoisomer differentiation for the analgesic drug nefopam hydrochloride using modeling studies of serotonin uptake area, 87
Serotonin receptors
Brain 5-HT_{1A} Receptors, 351
Simulation studies
Interactive simulation of nonuniform bolus and infusion dosing in linear compartmental models, 688
Sinker shapes
Effects of sinker shapes on dissolution profiles, 35
Solubility
Self-association and solubility behaviors of a novel anticancer agent, brequinar sodium, 95
Solubilities and solid state properties of the sodium salts of drugs, 485
Predicting the solubility of sulfamethoxypyridazine in individual solvents I: Calculating partial solubility parameters, 567
Micellar solubilization of a new antimalarial drug, β-arteether, 574
Effects of hydrotropic agents on the solubility, precipitation, and protein binding of etoposide, 577
Predicting the solubility of sulfamethoxypyridazine in individual solvents II: Relationship between solute–solvent interaction terms and partial solubility parameters, 672
Effect of pH and temperature on the solubility of a surface active carboxylic acid, 767
Effect of temperature and fat content on the solubility of hydrochlorothiazide and chlorothiazide in milk, 933
Spiroarsoranes
Pharmacokinetics of two spiroarsoranes administered intravenously or orally to rabbits, 203
Spray drying
Protective effect of sucrose on spray drying of oxyhemoglobin, 223
Stability
Stability of parenteral ceftriaxone disodium solutions in frozen and liquid states: Effect of freezing and microwave thawing, 73
Pralidoxime chloride stability-indicating assay and analysis of solution samples stored at room temperature for ten years, 132
Isoxazoles V: Chemical stability of diisoxazolylnaphthoquinone in aqueous solution, 408
Stability problems with hydralazine *p*-anisaldehyde hydrazone, 432
Improved anticonvulsant activity of phenytoin by a redox brain delivery system II: Stability in buffers and biological materials, 732
Preformulation studies of acetazolamide: Effect of pH, two buffer species, ionic strength, and temperature on its stability, 855
Pseudopolymorphism and phase stability in four solid forms of (6*R*,7*R*)-7-[2-(5-amino-1,2,4-thiadiazol-3-yl)-(*Z*)-2-methoxy-iminoacetamid]-3-[(4-carbamoyl-1-quinuclidinio)methyl]-8-oxo-5-thia-1-azabicyclo-[4,2,0]oct-2-ene-2-carboxylate (E1040), 893
Starch
Biodegradable microspheres XII: Properties of the crosslinking chains in polyacryl starch microparticles, 52
Stereoisomers
Stereoisomer differentiation for the analgesic drug nefopam hydrochloride using modeling studies of serotonin uptake area, 87
Identification of secretin diastereoisomers produced during synthesis, 91
Binding of nonsteroidal anti-inflammatory agents and their effect on binding of racemic warfarin and its enantiomers to human serum albumin, 195
Effect of *R* and *S* enantiomers of naproxen on aggregation and thromboxane production in human platelets, 324
Stereoselective synthesis of the diunsaturated metabolites of valproic acid, 667
Structure–activity relationships
Tricyclic heteroaromatic systems: Synthesis, [^{3}H]flunitrazepam brain membrane binding inhibition, and structure–activity relationships of 2,3-dihydro-2-aryl-4-*R*-[1]benzopyrano[4,3-*c*]pyrazole-3-ones, 239
Inhibitors of immune complex-induced inflammation: 3-[1-(2-benzoxazolyl)hydrazino]propanenitrile derivatives, 494
Sucrose
Protective effect of sucrose on spray drying of oxyhemoglobin, 223
Sulfamethoxypyridazine
Predicting the solubility of sulfamethoxypyridazine in individual solvents I: Calculating partial solubility parameters, 567
Predicting the solubility of sulfamethoxypyridazine in individual solvents II: Relationship between solute–solvent interaction terms and partial solubility parameters, 672
Sulfasalazine
A simple and rapid liquid chromatographic method for the determination of major metabolites of sulfasalazine in biological fluids, 235
Sulfathiazole
Polymorphism of sulfathiazole, 337
Synthesis studies
Control of pharmaceutical properties of soybean trypsin inhibitor by conjugation with dextran I: Synthesis and characterization, 117
Prodrugs of peptides IV: Bioreversible derivatization of the pyroglutamyl group by *N*-acylation and *N*-aminomethylation to effect protection against pyroglutamyl aminopeptidase, 122
Tricyclic heteroaromatic systems: Synthesis, [^{3}H]flunitrazepam brain membrane binding inhibition, and structure–activity relationships of 2,3-dihydro-2-aryl-4-*R*-[1]benzopyrano[4,3-*c*]pyrazole-3-ones, 239
2,3-Bis(2-pyridyl)-5,8-quinoxalinediones with metal chelating properties: Synthesis and biological evaluation, 267
Indeno[1,2-*c*]pyrazolone acetic acids as semirigid analogues of the nonsteroidal anti-inflammatory drugs, 343
Synthesis of 1,5-diaryl-3-methyl-1*H*-pyrazolo[4,5-*c*]isoquinolines and studies of binding to specific peripheral benzodiazepines binding sites, 437
Synthesis and in vitro antibacterial activity of some 1-(difluoromethoxyphenyl)quinolone-3-carboxylic acids, 585
Improved anticonvulsant activity of phenytoin by a redox brain delivery system I: Synthesis and some properties of the dihydropyridine derivatives, 609
Stereoselective synthesis of the diunsaturated metabolites of valproic acid, 667
Synthesis and antimicrobial activity of new substituted 10-methyl-1,2-dihydro-1-oxo-1,2,4-triazino(4,5-*a*)indoles, 780
Preparation and properties of (*R*-(−)-1-Azaicyclo[2.2.2]oct-3-yl-(*R*)-(+)-α-hydroxy-α-(4-[^{125}I]iodophenyl)-α-phenyl acetate and (*R*)-(−)-1-azabicyclo[2.2.2]oct-3-yl-(*S*)-(−)-α-hydroxy-α-(4-[^{125}I]iodophenyl)-α-phenyl acetate as potential radiopharmaceuticals, 833
Design, synthesis, DNA binding and biological activity of a series of DNA minor-groove-binding intercalating drugs, 910
6-Bis-(2-chloroethyl)amino-6-deoxy-D-galactopyranose hydrochloride: Synthesis, chemical characterization, murine P388 antitumor activity, and bone marrow toxicity, 918
Inhibition of 5-lipoxygenase by substituted 3,4-dihydro-2*H*-1,4-thiazines, 937
Anti-inflammatory activity of substituted 1,3,4-oxadiazoles, 999
Tableting technology
Pharmaceutical technology: Tableting technology, 182
Tablet machine instrumentation in pharmaceutics: Principles and practice, 1057
Taurocholate
Intestinal absorption of drugs I: The influence of taurocholate on the absorption of dantrolene in the small intestine of the rat, 285

Technetium-99m
Technetium-99m radiochemical assay by rapid filtration: A superior alternative to chromatography, 490
Teniposide
A pharmacokinetic model for intraperitoneal administration of drugs: Application to teniposide in humans, 389
Teratogens
Teratogens: Chemicals which cause birth defects, 351
Tetracycline
A pharmacokinetic model in the rat and rabbit of the direct measurement of mature bone resorption in vivo with [^{3}H]tetracycline, 823
A pharmacokinetic model in the rat and rabbit of the direct measurement of mature bone resorption in vivo with [^{3}H]tetracycline, 823
Tetracycline and erythromycin distribution in pathological lungs of humans and rat, 1015
Theophylline
Penetration of theophylline and adenosine into excised human skin from binary and ternary vehicles: Effect of a nonionic surfactant, 149
Pharmacokinetic analysis of single- or multiple-dose plasma drug concentration data with a microcomputer using multi-fraction absorption models, 154
New results on an in vitro model for the study of the influence of fatty meals on the bioavailability of theophylline controlled-release formulations, 261
Thioridazine
Single dose kinetics of thioridazine and its two psychoactive metabolites in healthy humans: A dose proportionality study, 796
T-lymphocytes
Potential use of an antagonist of cAMP-dependent protein kinase to block inhibition and modulate T-cell receptor-triggered activation of cytotoxic T-lymphocytes, 8
Tolbutamide
Simultaneous determinations of tolbutamide and its hydroxy and carboxy metabolites in serum and urine: Application to pharmacokinetic studies of tolbutamide in the rat, 863
Toxicity
Pharmacokinetics and toxicity of continuous infusion amphotericin B in cancer patients, 307
Cytotoxic effects of methionine alkyl esters and amides in normal and neoplastic cell lines, 465
Toxicity screening of *N*-alkylazacycloheptan-2-one derivatives in cultured human skin cells: Structure–toxicity relationships, 738
6-Bis-(2-chloroethyl)amino-6-deoxy-D-galactopyranose hydrochloride: Synthesis, chemical characterization, murine P388 antitumor activity, and bone marrow toxicity, 918
Phenylpropanolamine potentiates caffeine neurotoxicity in rats, 986
Trazodone
Quantitative analysis of trazodone hydrochloride in tablets by an ion-selective electrode, 62
Triamterene
Physicochemical and structural studies of triamterene, 598
Trimethoprim
Degradation of trimethoprim, 348
Pharmacokinetics of trimethoprim in the rat, 556
Trypsin inhibitor
Control of pharmaceutical properties of soybean trypsin inhibitor by conjugation with dextran II: Biopharmaceutical and pharmacological properties, 219
Tubular secretion
Pharmacokinetics and saturable renal tubular secretion of zidovudine in rats, 530
Tyrocidine
Structure of tyrocidine micelles in isotropic aqueous solution, 230
Urapidil
Physical characterization of the methanol solvate of urapidil, 28
Valproic acid
Stereoselective synthesis of the diunsaturated metabolites of valproic acid, 667
Vitamin D
Differential absorption vitamin D_3 and 1,25-dihydroxyvitamin D_3 by intestinal jejunal cells of the rat, 17
Warfarin
Microbial models of mammalian metabolism: Conversion of warfarin to 4′-hydroxywarfarin using *Cunninghamella bainieri*, 183
Binding of nonsteroidal anti-inflammatory agents and their effect on binding of racemic warfarin and its enantiomers to human serum albumin, 195
Comparative pharmacokinetics of coumarin anticoagulants XLIX: Nonlinear tissue distribution of *S*-warfarin in rats, 541
Zidovudine
Pharmacokinetics and saturable renal tubular secretion of zidovudine in rats, 530
Effect of probenecid on the renal and nonrenal clearances of zidovudine and its distribution into cerebrospinal fluid in the rabbit, 716
Zopiclone
Acid catalyzed hydrolysis of a series of zopiclone analogues, 627
Zoxazolamine
Kinetics of drug action in disease states XXXV: Effect of hypovolemia on the pharmacodynamics of zoxazolamine in rats, 785
